

Keeping Manufacturing Workers Safe

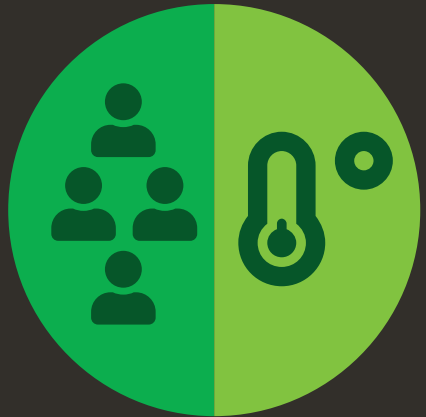

A manufacturing client reached out for help in keeping their workforce safe and healthy.

Taking extraordinary steps to protect worker health has become the new normal for employers across the country. A manufacturing client asked Kelly to source extra support to keep their large campus running safely.

Kelly engaged 50 workers over the course of just a few days to man nearly 60 checkpoints around the large site and to carry out temperature checks using thermal scanners. This extra line of defense could protect the health of hundreds of workers.

Thank you to all the amazing members of the Kelly community – individuals and organizations – who are doing their part in the battle against this global crisis.
