

Transforming Production to Save Lives

One of our large cosmetics clients has transformed production to manufacture and distribute hand sanitizer.

The pandemic crisis has prompted amazing acts of generosity around the world. A global cosmetics company is doing their bit by switching production to manufacture hand sanitizer for those who need it most.

This Kelly client will distribute free hand gel to first responders, public service workers, employees, and pharmacy staff free of charge. Starting with an incredible 180,000 units across the country.

Thank you to all the amazing members of the Kelly community – individuals and organizations – who are doing their part in the battle against this global crisis.
